WASTE MANAGEMENT

Benches and bins for waste separation were placed in 25 schools in Kamza Municipality, with the aim of raising awareness among young people about the separate disposal of waste.

BENEFICIARIES

Over 20 thousand students and community members are beneficiaries of green spaces. They were informed about waste management practices

GREENING SERVICES

25 ecological groups were formed, and "green" activities were developed in public schools with the participation of 752 students. The green spaces of 25 schools were expanded.

PURPOSE

The main objective of this project is to improve local waste management services and green spaces in the Municipality of Kamëz.

Implemented by
